DULUX GALVANISED IRON PRIMER

TECHNICAL DATA SHEET
Version 1 – 2015 JUNE
THIS ISSUE SUPERSEDES ALL PREVIOUS PUBLICATIONS

PRODUCT DESCRIPTION

A versatile, premium quality anti corrosive etch primer for interior or exterior galvanised iron and non-ferrous metals.

PRODUCT USES

- Primer for correctly prepared galvanised iron and non-ferrous metal.

FEATURES AND BENEFITS

- Excellent adhesion and corrosion resistance.
- Quick drying – recoat in 4 hours.
- Provides an excellent primed surface for a wide range of decorative topcoats
- No added lead

DULUX GALVANISED IRON PRIMER

APPLICATION INFORMATION

Mixing  Stir until homogeneous with a flat paddle
Application conditions  Surface Temperature between 10 - 35°C Relative Humidity between 10 - 85 % OR 2ºC above dew point minimum.
Application methods  Brush, roller or Spray.
Thinner  Thinning not recommended. For conventional spray applications thin with 5 to 10% of Etch Primer Thinner.
Drying Time  Touch dry 1 hour at 23ºC.
Recoating Time  4 hours at 23ºC
(C recoating times will be extended during cold, wet or humid conditions)
Cleaning of equipment  After use, remove as much product as possible, and then clean immediately with Etch Primer Thinner
Substrates  Well prepared galvanised iron and non-ferrous metals
Ensure surfaces are pre-cleaned.
Coats Required  Apply one or two coats Dulux Galvanised Iron Primer, depending on the severity of the conditions. Two coats are preferred for coastal conditions and chemical works.
Top Coating  Over-coat primer with two coats of selected Dulux decorative topcoat.
Precautions:  Do not apply during cold (below 10°C) or wet weather. Not suitable for direct application to powdery or friable surfaces whether previously painted or not.
Do not apply over rusty unprepared metal surfaces.
Quick drying - avoid application to very hot surfaces.
Not designed to withstand prolonged natural weathering. It should be over coated with conventional coatings within 18 - 24 hours, particularly in a marine atmosphere.

SURFACE PREPARATION

Ensure that surfaces are sound and free from dust, dirt, grease and oil before painting. Surfaces must be thoroughly dry.

NEW SURFACES

Galvanised Iron, Aluminium and all non-ferrous metals

- Remove all traces of temporary protective coating, dirt and grease from the surface with Dulux Galvanised Iron Cleaner. Ensure complete removal of Dulux Galvanised Iron Cleaner by rinsing with running water. A water-break free surface indicates thorough
DULUX GALVANISED IRON PRIMER

SURFACE PREPARATION

- cleaning - running water should not form droplets. If a water-break free surface was not achieved, repeat the cleaning process. Prime immediately after cleaning.
- Prime with one to two coats Dulux Galvanised Iron Primer, depending on the severity of the conditions. Two coats recommended for coastal conditions and chemical works.

PREVIOUSLY PAINTED AND WEATHERED SURFACES

- Clean bare galvanised iron as per new surfaces
- Rust and flaking paint must be completely removed prior to spot-prime exposed substrate with Dulux Galvanised Iron Primer. Build up spot-primed areas with Dulux Undercoat for All Surfaces to the same level as the rest of the paintwork.

HEALTH AND SAFETY INFORMATION

This product contains no added lead. Avoid contact with skin or eyes. Keep out of reach of children. If accidently swallowed, seek medical advice immediately and show this container to the doctor. Dry sanding, flame cutting and/or welding of the dry paint film will give rise to dust and/or hazardous fumes.

If exposure cannot be avoided by the provision of local exhaust ventilation, suitable respiratory protective equipment should be used. Do not empty into drains or watercourses. Ensure good ventilation during application and drying. It is recommended to use suitable protective clothing and equipment. To avoid the risk of spillage, always store and transport containers in a secure upright position. Refer to Material Safety Data Sheet for complete information.
