DULUX WEATHERGUARD FINE TEXTURED

TECHNICAL DATA SHEET
Version 1 – 2016 JULY
THIS ISSUE SUPERSEDES ALL PREVIOUS PUBLICATIONS

PRODUCT DESCRIPTION
A tough, durable exterior coating with Maxiflex™ that provides lasting elasticity to cover hairline cracks

PRODUCT USES
- Ideal as a finishing coat for exterior raw or previously painted concrete, cement plaster or fibre cement surfaces.
- Particularly recommended for direct application to exterior plastered surfaces where hairline cracks are present - capable of completely covering hairline cracks on ageing.
- Good exterior durability makes it ideal for use on high-rise buildings, major building projects, flats, townhouses and homes.
- Recommended for exterior walls.

FEATURES AND BENEFITS
- Fine textured finish.
- Unique texture hides plaster imperfections.
- Maxiflex™ - provides lasting elasticity to cover hairline cracks.* N.B. Hairline cracks do not exceed 0.2 mm.
- Excellent weather resistance.
- Tough, durable and water-resistant.

APPLICATION INFORMATION

<table>
<thead>
<tr>
<th><strong>Mixing</strong></th>
<th>Stir until homogenous with a flat paddle.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Application Surface Conditions</strong></td>
<td>Surface Temperature between 10°C - 35°C. Relative Humidity between 10 % - 85 % OR 2°C above dew point minimum.</td>
</tr>
<tr>
<td><strong>Application Methods</strong></td>
<td>Ready for use with brush or roller. Spray is not recommended as Dulux Weatherguard Fine Textured contains fine marble aggregate.</td>
</tr>
<tr>
<td></td>
<td>Rolling: It is important not to overspread the product. Two coats should be applied allowing at least four hours between coats. Caution: Textured coatings are prone to application witnesses to some degree. Adhere strictly to recommended spreading rate. If the spreading rate is exceeded, the film thickness is reduced. On the other hand, if the paint is under-spread, thicker patches would be visible on flat surfaces. Apply with overlapping V-shaped strokes, i.e. a combination of horizontal, diagonal and vertical strokes. It is also very important to maintain a wet edge during application. N.B. Lamb’s wool roller recommended. The pile on synthetic rollers is longer, making the desired result difficult to achieve.</td>
</tr>
<tr>
<td></td>
<td>Brushing: For brush application, it is essential to apply the material by laying-on and finishing in an upward direction (brushing may give an uneven finish).</td>
</tr>
<tr>
<td><strong>Thinner</strong></td>
<td>Thinning not recommended. Thinning will reduce opacity as well as crack bridging properties.</td>
</tr>
<tr>
<td><strong>Drying Time</strong></td>
<td>Touch dry 60 minutes</td>
</tr>
<tr>
<td><strong>Recoating Time</strong></td>
<td>4 hours at 23°C. (Drying times will be extended during cold, wet or humid conditions.)</td>
</tr>
<tr>
<td><strong>Cleaning of Equipment</strong></td>
<td>After use, remove as much product as possible, and then clean immediately with water.</td>
</tr>
<tr>
<td><strong>Substrates</strong></td>
<td>Suitable for cement plaster, gypsum plaster, composite boards, wood, concrete, fibre cement ceiling boards, PVC and metal surfaces provided that appropriate preparation is carried out.</td>
</tr>

DULUX WEATHERGUARD FINE TEXTURED

APPLICATION INFORMATION

Precautions:  Do not apply during cold (below 10°C) or wet weather.  
Do not apply directly to bare metal surfaces.  
Not suitable for direct application to powdery or friable 
surfaces whether previously painted or not.  
The Dulux Plaster Primer is alkali resistant; certain tinted 
colours may still be susceptible to alkali burn.  
Do not clean surface within 7 days of application.

Coats Required  Apply two to three finishing coats to new surfaces to 
achieve a closed film and solid colour.

Top Coating  N/A

SURFACE PREPARATION

Ensure that surfaces are sound and free from dust, oil, grease, dirt, and debris. Remove 
powdery residue with a stiff brush. Surfaces must be thoroughly dry - no more than 12% 
moisture content.

NEW SURFACES

Cement Plaster (non-friable)
- It is recommended that fresh plaster should be allowed one week drying for every 5mm 
thickness; and longer in cold or damp weather.
- Prime with Dulux Plaster Primer or Dulux Trade Alkali Resistant Primer or Dulux 
  Trade Plaster Primer or one coat Dulux Exterior Weatherguard Fine Textured, 
thinned up to 10% with water to aid absorption.

Gypsum Plaster (non-friable), Composite Boarding and Fibre Cement
- Spot-prime metal strips and nail heads with appropriate metal primer.
- Prime with Dulux Plaster Primer or Dulux Trade Alkali Resistant Primer or Dulux 
  Trade Plaster Primer.
- For very absorbent surfaces such as gypsum plaster more than one coat of Primer 
could be required to achieve correct binding and sealing properties.

Concrete
- Ensure that concrete is fully cured and sound. Re-move any un-cured cement, grease, 
  and mould-release agents by high-pressure water blast, or wash with a strong solution 
of sugar soap. Rinse off thoroughly with clean water and allow drying.
- Prime with Dulux Plaster Primer or Dulux Trade Alkali Resistant Primer or Dulux 
  Trade Plaster Primer.
DULUX WEATHERGUARD FINE TEXTURED

SURFACE PREPARATION

NEW SURFACES

**Galvanised Iron and Aluminium**
- Clean and degrease with Dulux Galvanised Iron Cleaner, until water break free surface is achieved.
- Prime the same day with one to two coats Dulux Galvanised Iron Primer, depending on the severity of the conditions. Two coats recommended for coastal conditions and chemical works.

**Wooden Surfaces**
- Sand smooth working in the direction of the grain. Ensure substrate is clean and dry.
- Prime with Dulux Wood Primer.
- Alternatively, timber surfaces can be primed with Dulux Supergrip to give a complete water based system.

**PVC Gutters/Downpipes**
- Clean and sand well to improve adhesion. Ensure surface is clean and dry.
- Prime with one full coat Dulux Supergrip.

PREVIOUSLY PAINTED SURFACES

**Good Condition - non powdery, no cracks, no peeling or flaking**
- Clean surfaces with Sugar Soap. Wash down with water. Alternatively, high pressure water cleaning.
- For surfaced previously painted with water based paints, apply directly.
- For surfaced previously painted with enamel paints, sand to a matt finish to aid adhesion and follow with a coat of Dulux Universal Undercoat. Apply directly.

**Poor Condition - damaged, friable surfaces**
- Strip loose and flaking paint completely using high-pressure water (150-200 Bar) or other appropriate means.
- Friable surfaces must be removed and repaired.
- Mould instructions. To clean lichen and algae growth, scrub with either 4:1 water/chlorine, or 4:1 water/ sodium hypochlorite solutions. Ensure that the areas are completely saturated, and allow the solution to react for a minimum of 4 hours. Rinse the complete wall surface thoroughly with clean water.
- Chalked surfaces must be thoroughly brushed or prepared with high pressure water cleaning. Allow drying. Priming with Dulux Bonding Liquid, which is un-pigmented, is preferred as it has the ability to penetrate further into the surface but need to be over coated within 48 hours.
- Prime all exposed areas with appropriate primer as recommended under new surfaces. For very absorbent surfaces more than one coat primer may be required to achieve correct binding and sealing properties.
DULUX WEATHERGUARD FINE TEXTURED

FILLING

Fill all imperfections with the appropriate Dulux Pre-Paint Filler and spot prime filled areas with Dulux Plaster Primer once the crack filler has dried properly. Failure to do this will result in uneven sheen levels between the repaired and normal areas.

HEALTH AND SAFETY INFORMATION

This product contains no added lead. Avoid contact with skin or eyes. Keep out of reach of children. If accidentally swallowed, seek medical advice immediately and show this container to the doctor. Dry sanding, flame cutting and/or welding of the dry paint film will give rise to dust and/or hazardous fumes.

If exposure cannot be avoided by the provision of local exhaust ventilation, suitable respiratory protective equipment should be used. Do not empty into drains or watercourses. Ensure good ventilation during application and drying. It is recommended to use suitable protective clothing and equipment. To avoid the risk of spillage, always store and transport containers in a secure upright position. Refer to Material Safety Data Sheet for complete information.

ADDITIONAL INFORMATION

Packaging

Standard Colours: 5lt, 20Lt
Tint Bases – Pastel Base 7, Medium Base 8 and Deep Base 9: 5lt, 20Lt

Storage Conditions

Store under cool dry conditions away from direct sunlight, heat and extreme cold.

Disclaimers

Colour references are as accurate as modern printing will allow. Please refer to the in-store stripe cards/standard card, or on-shelf colour displays for an accurate representation of the colour.
Among others, the following factors may affect final colour appearance: product sheen and texture, colour and light reflections, application, surface texture and preparation.
For best colour and sheen consistency, it is advisable to use containers of the same batch number, or to mix different batches together in a large container, or to finish in a corner before starting a new container.
ADDITIONAL INFORMATION

Tinting Protocol

The tint base containers are only filled to levels which are specific for each tint base to allow the calculated volume of colourants to be added in order to achieve the volume indicated on the container after tinting. Tint bases and colourants are unfinished products which should not be used on their own. Only once the prescribed colourant is added to the specific tint base will the finished product comply with the technical features and related information as set out in this Technical Data Sheet.

GUARANTEE

Dulux offers a 12-year product guarantee on Dulux Weatherguard Fine Textured (standard colours and tint bases when tinted with Dulux colourants). Dulux Weatherguard Fine Textured tinted with non-Dulux colourants is not guaranteed, Dulux has no control over the tinting process or the quality of the colourants used. To register your guarantee, simply call the Dulux Technical Helpline within 30 days of purchase. Simply supply your contact details, the site details, purchase details, batch number and related products used. You will receive a Guarantee Reference Number that you should record and keep in a safe place, together with your purchase slip for future reference. For terms and conditions of the guarantee, please visit www.duluxguarantee.co.za or contact Dulux Technical Helpline on 0860 330 111.

TDS STANDARD DISCLAIMER

The recommendations contained herein are given in good faith and meant to guide the specifier or user in accordance with good painting practices. They are gained from our tests and experiences and are believed to be accurate and reliable. No warranty/guarantee is implied by the recommendations contained herein since the conditions of use; application method, substrate and cleanliness of the substrate are beyond Dulux control.

Important Note; Technology may change with time, necessitating changes to this Technical Data Sheet (TDS).
