PRODUCT USES
Suitable for cement plaster, gypsum plaster, concrete, fibre cement, previously painted surfaces, metal surfaces, wooden surfaces and bathroom and kitchen ceilings provided that the appropriate preparation is carried out.

FEATURES AND BENEFITS
Excellent exterior durability, flexibility and adhesion to cement based surfaces.
Excellent alkali resistance and adhesion to cement based surfaces.
Outstanding water and dirt resistance.
Inherent mould resistant properties (Mouldex) prevents the growth of fungus.
Provides excellent stain resistance and washability.

<tbody>
<tr>
<td>Appearance</td>
<td>Mid-sheen</td>
</tr>
<tr>
<td>Colour</td>
<td>White and the following tint bases: Pastel Base 7, Medium Base 8, and Dark Base 9 from the Dulux Colour System</td>
</tr>
<tr>
<td>Density at 23°C</td>
<td>Approx. : 1.29 kg/L</td>
</tr>
<tr>
<td>Solids Content</td>
<td>By weight : Approx. 48%</td>
</tr>
<tr>
<td></td>
<td>By volume : Approx. 36%</td>
</tr>
<tr>
<td>Packaged Viscosity</td>
<td>Viscosity at 23°C : Approx 110 KU</td>
</tr>
<tr>
<td>Spreading Rate</td>
<td>Approx 12 to 14m² per litre depending on surface porosity, profile and application method</td>
</tr>
<tr>
<td>Recommended DFT per coat</td>
<td>Min. 25µm. Max. 35µm.</td>
</tr>
<tr>
<td>VOC Level</td>
<td>Max 25g/L (tinted)</td>

APPLICATION INFORMATION

| Application conditions        | Surface Temperature between 10°C - 35°C |
| Application methods          | Relative Humidity between 10 % - 85 %   |
|                              | Brush, roller or airless spray         |
**APPLICATION INFORMATION**

**Thinner**

- Thinning not recommended
- Ready for use after thorough stirring

**Drying Time**

- Touch dry 30 minutes (Drying times will be extended during cold, wet or humid conditions)

**Recoating Time**

- 4 hours

**Cleaning of equipment**

- Clean immediately with water

**Substrates**

- Suitable for cement plaster, gypsum plaster, concrete, fibre cement, metal and wooden surfaces if appropriate preparation is carried out.

**Precautions**

- Ensure that surfaces are sound and free from dust, dirt, grease and oil. Surfaces must be thoroughly dry - no more than 12% moisture content.
- Do not apply during cold (below 10°C) or wet weather.
- Do not apply directly to bare metal surfaces.
- Not suitable for direct application to powdery or friable surfaces whether previously painted or not.

**SURFACE PREPARATION**

**NEW SURFACES**

**Cement Plaster (non friable), Concrete, Fibre Cement**

- It is recommended that fresh plaster should be allowed one week drying for every 5mm thickness; and longer in cold or damp weather.
- From concrete surfaces, remove any uncured cement, grease, and mould-release agents by high-pressure water blast, or wash with a strong solution of sugar soap. Rinse off thoroughly with clean water.
- Spot-prime metal strips and nail heads with appropriate primer.
- Apply direct. The first coat must be thinned to aid adhesion.

**Gypsum Plaster, Composition Boarding**

- Spot-prime metal strips and nail heads with appropriate primer.
- Prime with one full coat Dulux Trade Alkali Resistant Plaster Primer.

**PVC Gutters/Downpipes**

- Sand well to improve adhesion. Ensure surface is clean and dry.
- Prime with one coat Dulux Supergrip All-Surface Primer.

**Wooden Surfaces (doors)**

- Prime with Dulux Primer for Wood.
- Alternatively, timber surfaces can be primed with Dulux Supergrip to give a complete water based system.

**Galvanised Iron, Aluminium, and all non-ferrous metals**

- Clean and degrease with Dulux Cleaner for Galvanised Iron. A water-break free surface indicates thorough cleaning - running water should not form droplets.

**PREVIOUSLY PAINTED SURFACES**

**Sound, not Powdery**

- Clean surfaces with Dulux Sugar Soap. Wash down with water.
- For enamel surfaces, sand to a matt finish to aid adhesion and follow with a coat of Dulux Undercoat for All Surfaces. Apply finish coats.

**Old Paint in Poor Condition**

- Strip loose and flaking paint completely and spot prime bare areas with Dulux Trade Alkali Resistant Plaster Primer.
- Friable and porous surfaces must be removed and repaired.
- Mould instructions. To kill lichen and algae growth, scrub with one of the following solutions: either 25% chlorine solution and water or 25% bleach (sodium hypochlorite) and water solution. Ensure that the areas are completely saturated, and allow the solution to react for a minimum of 4 hours. Rinse the complete wall surface thoroughly with clean water.

**Filling**

- Fill and repair imperfections with the appropriate Dulux Filler and prime with Ecosure Plaster Primer once the crack filler has dried properly. Failure to do this will result in uneven sheen levels between the repaired and normal areas.

**HEALTH AND SAFETY INFORMATION**

- For detailed safety information refer to Material Safety Data Sheet.
- Keep out of reach of children.
- Ensure good ventilation during application and drying.
- Non-flammable.

**ADDITIONAL INFORMATION**

- **Storage Conditions**
  - Store under cool dry conditions.
- **Disclaimers**
  - For best colour and sheen consistency, it is advisable to use containers of the same batch number, or to mix different batches together in a large container, or to finish in a corner before starting a new container.
